## BALANCE TO AVOID SERVICE CHARGE

- The average daily balance is calculated by adding the principal in the account for each day of the period and dividing that figure by the number of days in the period.
- The minimum daily balance is the minimum principal balance that is in the account at the end of a business day during the period.

## INTEREST BEARING ACCOUNTS

### **Daily Balance Method:**

We use the daily balance method to calculate the interest on your account. This method applies a daily periodic rate to the principal in the account each day.

### **Variable Tiered Rate:**

The interest rate and annual percentage yield on your account are disclosed on the Savings and Investments rate sheet. Your interest rate and annual percentage yield may be as low as 0.00%. The interest rate and annual percentage yield may change. At our discretion, we may change the interest rate on your account at any time and without notice. As this is a tiered rate account the applicable rate tier will apply to the entire daily balance in your account.

### **Accrual, Compounding and Crediting:**

#### **Interest Bearing Checking and Money Market Savings**

**Accounts:** Interest begins to accrue no later than the business day we receive credit for the deposit of noncash items (for example, checks). Interest will not compound and will be computed on a simple interest, three hundred sixty-five (365) day basis (three hundred sixty-six (366) day basis during leap years). Interest will be credited monthly. If you close your account before interest is credited, you will not receive the accrued interest.

**Regular Savings and Holiday Club Accounts:** Interest begins to accrue no later than the business day we receive credit for the deposit of noncash items (for example, checks). Interest will be compounded daily using a three hundred sixty-five (365) day basis. Interest will be credited to Regular Savings accounts on a quarterly basis. Interest will be credited to Holiday Club accounts on an annual basis when the balance is transferred. If you close your account before interest is credited, you will not receive the accrued interest.
